SUNBURST CHEMICALS

VITAL

Bio-Active Cleaner / Deodorant Digestant

CLEANING SOLUTIONS FOR THE HEALTH OF YOUR BUSINESS.

VITAL

Bio-Active Cleaner / Deodorant Digestant

SUNBURST CHEMICALS

VITAL is a concentrated blend of detergents and bacterial agents that break down solid organic materials that cause odors on hard surfaces and plug drains, grease traps and sewer lines. Also used as a general purpose odor control product.

Restroom hard surface and bowl cleaner that cleans and deodorizes with long lasting biological based chemistry.

Pleasant scent eliminates foul smelling odors.

Regular addition to drains prevents sludge accumulation throughout drain system.

Non-harmful bacteria suspension that keeps drains flowing.

Helps liquify septic tank and drain field solids.

PACKAGING:

4 x 32 oz/case (#162532); 12 x 32 oz/case (#162512); 5 gal pail (#162505)

PROPERTIES:

Color - White Liquid
Fragrance - Mild mint
pH - 6.0-9.0
Detergency - Good
Wetting - Fair
Emulsification - Fair
CFU's - 54.4 Billion/gal
Hard Water Tolerance - Excellent
Rinsability - Excellent
Fumes - None
Flash Point - None
Corrosive Factor - None
ShelfLife-2yearsminimum

DIRECTIONS FOR USE:

Bowl Cleaner: Use daily as a toilet cleaner. Adequately cover the interior surface of the toilet bowl with a bowl mop. Leave bio-enzymatic cleaner in the bowl for as long as possible or until the first flush. For heavy encrustation a bowl mop may be needed.

Deodorizer: Physically remove as much of the source of the malodor as possible. Follow this by mopping product directly on the source of the odor with a cloth moistened with product.

Drain Lines and Down Pipes: Daily use in shower, sink and tub drains will keep pipes free and clear of grease, fats, and other solid wastes. Use product 2-4 times weekly. Add just 2 ounces of product for each inch of pipe size. Example: 1" pipe = 2 oz. product, 4" pipe = 8 oz. product, etc. Regular use will not damage pipes or chrome.

Grease Traps: Add 1 ounce of product per 5 cubic feet of volume to the feeder drain closest to the grease trap, preferably at the end of the processing day so it can work in the trap overnight. Flush the trap with 2-3 cups of warm water. Repeat daily for best results. For initial clean-ups, use 2-3 ounces of product per 2 cubic feet for the first week.
